Pick Phase: ABBAABBA

6.7.5 Selection Error

In the event of an erroneously-selected Champion pick or ban, the team in error must notify a Riot Partner Operator official before the other team has locked in their next selection. If so, the process will be restarted and brought back to the point at which the error occurred so that the team in error may correct its mistake. If the next selection is locked before the team in error gives notice to a Riot Partner Operator official, the erroneous selection shall be deemed irrevocable.

6.7.6 Trading Champions

Teams must complete all Champion trades before the 20-second mark during the Trading Phase, or will be subject to a penalty in future games. Summoner spells also cannot be changed after the 20-second mark.

6.7.7 Game Start After Pick/Ban

A game will start immediately after the pick/ban process is complete, unless otherwise stated by a Riot Official or Riot Partner Official. If played in a live studio, at this point Riot Partner Officials will remove any printed materials from the Match Area, including any notes written by Team Members. Players are not allowed to quit a game during the time between the completion of picks/bans and game launch, also known as “Free Time.”

6.7.8 Controlled Game Start

In the event of an error in-game start or a decision by Riot Partner Operator to separate the pick/ban process from game start, a Riot Partner Operator official may start the game in a controlled manner using Blind Pick. All players will select Champions in accordance with the previous valid completed pick/ban process. Game settings as described in section 6.7, excepting Game Type as Blind Pick.

If any failure occurs which interrupts the loading process and prevents a player from joining a game upon game start, the players from both teams must wait until all ten players are connected to the game before leaving the fountain according to Riot Partner Officials instructions.

6.8 Team Compensation

Each Team which qualifies for Group Stage shall receive travel expenses of HKD250 per match day if the event is offline and onsite. Basic food and beverage options will be provided however teams are responsible for their own food arrangements.

7. Game Rules

7.1 Definition of Terms

7.1.1 Unintentional Disconnection

A player losing connection to the game due to problems or issues with the game client, platform, network, or mobile phone.

7.1.2 Intentional Disconnection

A player losing connection to the game due to player’s actions (i.e. quitting the game). Any actions of a player which lead to a disconnection shall be deemed intentional, regardless of the actual intent of the player.

7.1.3 Server Crash

All players losing connection to a game due to an issue with a game server, or venue internet instability.

7.2 Game of Record

A game of record (“GOR”) refers to a game where all ten players have loaded and which has progressed to a point of meaningful interaction between opposing teams.

Once a game attains GOR status, the period ends in which incidental restarts may be permitted and a game will be considered as “official” from that point onward. After the establishment of GOR, game restarts will be allowed only under limited conditions (see Section 7.3). Examples of conditions which establish GOR:

- 7.2.1** Any attack or ability is landed on minions, jungle creeps, structures, or enemy Champions.
- 7.2.2** Line-of-sight is established between players on opposing teams.
- 7.2.3** Setting foot, establishing vision or targeting skillshot ability in the opponent’s jungle by either team, which includes either leaving the river or entering brush connected to enemy jungle.
- 7.2.4** Game timer reaches 1 minute 30 seconds (00:01:30).

7.3 Game Restart

The decision of which condition(s) shall justify a game restart is solely at the discretion of Riot Partner Operator officials. Examples are listed below for purposes of illustration only:

7.3.1 Restarts Before GOR

The following are examples of situations in which a game may be restarted if GOR has not been established.

- If a player notices that the player's rune or mastery have not applied correctly between the game lobby and match, the game may be restarted.
- If a Riot Partner Operator official determines that technical difficulties will not allow for the game to resume as normal (including a team’s ability to be in proper position for certain game events, such as minion spawn).

7.3.2 Restarts After GOR

The following are examples of situations in which a game may be restarted after GOR has been established.

- If a game experiences a critical bug at any point during the match which significantly alters game stats or gameplay mechanics.
- If a Riot official determines that there are environmental conditions which are unfair (e.g. excessive noise, hostile weather, unacceptable safety risks).

7.3.3 Restart Protocol

If a game experiences a critical bug at any point during the match that significantly alters game stats or gameplay mechanics, or the external environmental conditions at a live event become untenable then a restart may occur.

Certain circumstances must be met before a restart may occur. Riot officials must determine that the bug is critical and verifiable. For the bug to be considered critical, the bug must significantly damage a player’s ability to compete in the game situation. The determination of whether the bug has damaged a player’s ability to compete is up to the sole discretion of the Riot officials. In order for a bug to be considered verifiable, the bug must be

conclusively present and not possibly attributable to player error. The spectator must then be able to replay the instance in question and verify the bug.

If a player believes they have experienced a critical bug, they must alert a referee in a timely fashion. If it is believed that a player is attempting to delay reporting of a bug to wait for a possible restart at a more advantageous time, then a restart will no longer be granted.

If Riot Partner Operator officials determine that the bug is critical and verifiable and that the player followed the pause protocol, then the disadvantaged team will be presented with the option for a restart. If the team accepts, the game will immediately be restarted as per the rules established in Section 7.4. An exception to Rule 7.4 is if the restart occurred due to a champion bug, then settings no longer will be retained (including picks and bans) regardless of Game of Record status and the champion will be made ineligible for at least the remainder of the day's matches unless the bug can be conclusively tied to a specific game element that can be fully removed (i.e. a skin that can be disabled) or prohibited (i.e. the purchase of items).

7.3.4 Controlled Environment

Certain conditions may be preserved in the event of a restart of a game that has not reached GOR, including, without limitation, picks/bans or Summoner spells. If, however, a match has reached GOR, Riot officials shall not retain any settings.

7.3.5 Player Confirmation of Settings

Each team captain shall verify that every player on his/her team has finalized their intended game settings (including runes, masteries, controls, and GUI settings) before GOR is established. Any error in verification is not grounds for a game restart after GOR is established.

7.4 Awarded Game Victory

In the event of a technical difficulty which leads Riot Partner Operator officials to declare a restart, Riot Partner Operator officials may instead award a game victory to a team. If a game has been played for more than 15 minutes on the game clock (00:15:00), Riot officials, in their sole discretion, may determine that a team cannot avoid defeat to a degree of reasonable certainty.
